

# BIOTIX S

An innovative compound of active phytoncides

Improves condition of the flock

Supports immunity

## BIOTIX S

Phytoncides contained in Biotix S have particular antibacterial, antifungal and antiviral properties as well as the ability to stimulate the digestive or immune functions of the body. They exhibit non-specific effects, which means they inactivate bacteria, fungi or viruses in a number of different ways. Their high concentration in the bird's organism maintains for up to 24 hours after administration and shows activity in various organs such as lungs, liver, intestines and stomach.

## INDICATIONS

Biotix S is intended for each production type or group of poultry during periods of disorders in the flock general condition:

- 1 inhibit the development of harmful bacteria, fungi and viruses in the gut,
- 2 stops the development of respiratory pathogens,
- 3 stimulation of the gastric juice production and improvement of smooth muscle functioning,
- 4 supports the bird's organism during the period of viral infection.

## APPLICATION

250-500 ml

1000 l drinking water

12 h a day

4-5 days

## COMPOSITION:

Active, highly concentrated herbal extracts „ALL IN technology“, glycerine, propylene glycol

IMMUNITY - INFECTIONS
