

BIOSTRESS C

+ salicylates

Complete protection during heat stress

-  Lowers overheating symptoms
-  Prevents dehydration
-  Supports immunity

THERMAL STRESS - SUMMER

BIOSTRESS C + salicylates

is a comprehensive product designed for effective and safe protection during periods of thermal stress. Innovative and advanced production technology provides optimum composition of the high doses of the natural salicylates, vitamin C, anise oil, citric acid as well as sodium, potassium, and magnesium. Biostress C + salicylates shows a number of advantageous effects on animals body. Improves the general condition, helps in adaptation to high temperatures, cools, regulates the water-electrolyte economy, protects the blood and respiratory system, stimulates the appetite and digestion processes.

INDICATIONS

Formulation is intended for administration to all species and production groups of poultry during the period of heat stress:

- 1 improves condition (BioPoint natural salicylates),
- 2 replenishes the electrolytes (sodium, potassium, magnesium),
- 3 retains water in the organism (betaine),
- 4 cools (citric acid, vitamin C),
- 5 improves growth and egg laying (BioPoint natural salicylates, anise oil and vitamin C).

APPLICATION

250 g	1000 l drinking water	24 h a day continuous application	3-5 days
