

Cocclin plus

*Digestive system
in good condition*

Cocclin plus is a new generation of our best selling Cocclin product. It significantly reduces the risk of anaerobic bacteria infections (clostridium perfringens) and protozoa infection (eimeria-sp. and histomonas meleagridis). Thanks to its strong herbal component it impedes the growth processes of the bacteria and protozoa, allowing safe and effective application of the product for animals irrespectively of their age. Apart from the direct effect of pathogens Cocclin shows distinctive anti-inflammatory and immune stimulatory activity, responsible for quick recovery and limited loss caused over the course of the disease.

Composition: mixture of flavouring compounds, vitamin B2, vitamin B12, propylene glycol, glycerine

Indications: The product is intended for each production type or group of poultry. It is recommended in case of:

- feed consumption disorders
- indigestion
- recovery period
- gastroprotection

Dosage: 500 ml / 1000 L in 1/2 water consumed, for 3-5 days

Package: 1L, 2L, 5L
