

Eimerin

*In bacterial and
protozoan infections*

Eimerin is a concentrated composition of herbs and natural active agents (e.g. allicin and thymol), which are responsible for digestion processes support, especially in feed consumption disorders. Eimerin's rich formula whets the appetite allowing better absorption of the nutrients from the feed. Eimerin supports the homeostasis of the digestive system.

Composition: mixture of flavouring compounds, sorbitol, glycerine

Indications: Eimerin is intended for each production type or group of poultry:

- supportive during feed consumption disorders (coccidiosis, anaerobic bacteria infections),
- indigestion (diarrhoea)
- improvement of appetite

Dosage: 500 – 1500 ml / 1000 L of drinking water for 5–7 days

Package: 1L, 2L, 5L
