

Hepamix plus

Healthy liver

Hepamix plus is a reinvented product, specifically intended for intensive husbandry purposes, where the risk of frequent liver disorders (e.g. liver failure, fatty liver) is high. The B-group vitamins combined with natural, plant extracts protect the hepatocytes, whereas the indispensable amino acids support the development of the liver cells.

Composition: mixture of flavouring compounds, vitamin B1, vitamin B2, vitamin B6, choline chloride, betaine, L-Carnitine, leucine, isoleucine, valine, potassium chloride, sodium chloride, propylene glycol

Indications: Hepamix plus is intended for each production type or group of poultry in case of:

- liver and gallbladder function disorders
- fat metabolic disorders
- high ratio of fat component in the feed
- liver load (as a result of anti-infective agents therapy)

Dosage: 250 - 500 ml / 1000 L of drinking water, half daily water consumption for 3-5 days

Package: 1L, 2L, 5L
