

# Beetonic

*For full range of amino acids*

**Beetonic** contains all amino acids necessary for honeybees. Amino acids increases royal jelly production. Royal jelly is a natural antibacterial and antifungal substance. Beetonic improves all of the metabolic processes occurred in organism and this way optimizes paramateres of resistance against diseases, increases condition of brood and adult bees and increases productivity of bee colonies and decreases mortality rate.

**Composition:** choline chloride, methionine, lysine, leucine, isoleucine, alanine, arginine, aspartic acid, glutamic acid, glycine, histidine, phenylalanine, proline, serine, threonine, tyrosine, valine

**Indications:**

- Stimulates the queen for egg laying
- Increases the production of royal jelly
- Decreases honeybee deaths

**Dosage:**

It is used as 5 ml for 0,5-1 liter 1/1 sugar syrup and 1 kg honey-sugar candy during the time of feeding bees

**Package:** 250 ml, 500 ml, 1L
