

# Immunbee

*Stimulates immunity*

**Immunbee** is balanced composition which stimulates the immune system. Immune system is very important for the body's bacterial and viral resistance against illness and damages from varroa. Zinc is an essential mineral involved in the production of certain immune cells. Vitamin C acts as an antioxidant. Antioxidants help to fight free radicals, a type of unstable molecule known to damage the immune system. There is some evidence that vitamin C may be particularly helpful in boosting the immune system of honeybee under the major stress. Also, vitamin C is a necessary for the tissue regeneration. Herbs oils ensure the increase in body strength against infections.
